# Automatic Trimmer

This automatic trimmer is designed to be used with the roll laminators in order to complete the laminating system. It has two side-slitting blades and the cross trimmer, so you will have a 4-edges trimmed sheet. The control panel is user friendly and can be operated easily. An integrated photocell sensor precisely activates the trimmer as it senses the leading and trailing edges of each sheet to be cut. The feeding roller and guiding bars can enable the film go straight, without deviation. The regulator bar will stop the machine automatically when there is no film feeding-in.

## Features

- ⊙ Variable speed up to 15 m/min
- ⊙ 4 sides trimming
- ⊙ Long life trimming blade
- ⊙ Multi-safety protections
- ⊙ No film automatic stopping
- ⊙ Modern and user friendly control panel display

Control Panel

## Technical specifications

Model	AT-360	AT-450	AT-650
Max. working width	370 mm	460 mm	660 mm
Max. working speed	15 m per minute		
Suitable film thickness	75mic - 250mic		
Margin size	-10mm to +25mm		
Control system	LCD display control system		
Power requirement	AC 100V; 110V; 220-240V; 50/60Hz		
Power consumption	120 W	120 W	150 W
Machine dimensions without stand (LxWxH)	735 X 370 X 270mm	885x370x270mm	1075x370x270 mm
Machine dimensions without stand (LxWxH)	735 X 370 X 960mm	885x370x960mm	1075x370x960mm
Machine weight without stand	29 kg	45 kg	55 kg
Machine weight with stand	38 kg	56 kg	70 kg
